

Nurix Therapeutics to Present at 2019 American Association for Cancer Research (AACR) Annual Meeting

March 19, 2019

SAN FRANCISCO, March 19, 2019 (GLOBE NEWSWIRE) — Nurix Therapeutics, Inc., a private company discovering drugs that harness the body's natural process to control protein levels, today announced an upcoming oral presentation at the 2019 American Association for Cancer Research (AACR) Annual Meeting from March 29 – April 3, 2019 at the Georgia World Conference Center in Atlanta, Georgia.

ORAL PRESENTATION DETAILS

Presentation Title: Genetic and pharmacologic evaluation of the ubiquitin ligase CBL-B as a small-molecule, tumor immunotherapy target

Session Category: Experimental and Molecular Therapeutics

Session Title: Preclinical Drug Development

Date: Monday, April 1, 2019

Time: 3:50 p.m.-4:05 p.m. EDT

Location: Georgia World Conference Center, Room B206

ABOUT NURIX THERAPEUTICS

Nurix discovers drugs that harness the body's natural process to control protein levels. Our drugs control ubiquitin E3 ligases, the key enzymes responsible for protein breakdown in human cells, as a unique therapeutic approach to treat a broad range of diseases. Our initial focus is on developing drugs as treatments for hematologic cancers and immune-mediated diseases including immuno-oncology therapeutics for cancer. Nurix was founded by internationally-recognized experts in ligase biology and immunology and is funded by leading life science investors Third Rock Ventures and The Column Group. In September 2015, Nurix and Celgene entered into a broad collaboration targeting protein homeostasis for next-generation therapies in oncology, inflammation and immunology. The company is headquartered in San Francisco, California. For more information, please visit <https://www.nurixtx.com>.
